

1. Learn what semantic tags are and why they are important for SEO & accessibility. Compare semantic vs non-semantic tags.

The semantic tags are used to create content in the html document. It gives the meaning and content of the webpage such as <header> <footer> <aside> <article> <section> <navigation> or <nav>

Benefit: Adds context, structure, and meaning for browsers, search engines, and assistive technologies.

The semantic tags plays a crucial role in identification of websites for the purpose of search engine optimization to understand and rank the html page accordingly

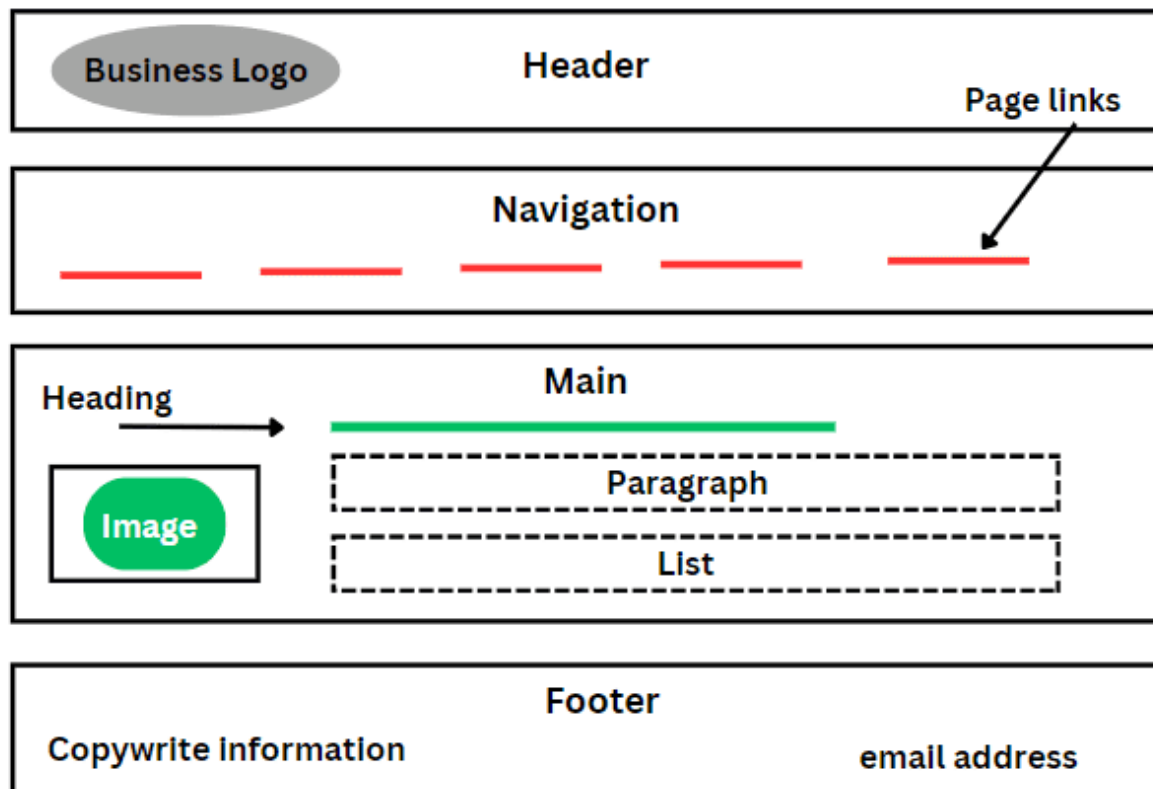

SEO and accessibility refers to using legit <header> <footer> etc to make the website simple and easy to access for everyone regardless of the platforms that they are using (usable by everyone, including those with disabilities) inherently creates a better user experience(UX)

SEMANTIC TAGS	NON SEMANTIC TAGS	DEFINITION
USED TO CO-OP WITH SEO OPTIMIZATION	USED TO MAKE BLOCK LEVEL AND IN LINE ELEMENTS EXAMPLE<DIV> AND 	MEANING
INDULGES IN THE CREATION OF CONTEXT FOR THE HTML PAGE	MADE USE IN CSS	USE CASE
EXAMPLE <HEADER> <FOOTER>	EXAMPLE <I> <DIV> 	EXAMPLES

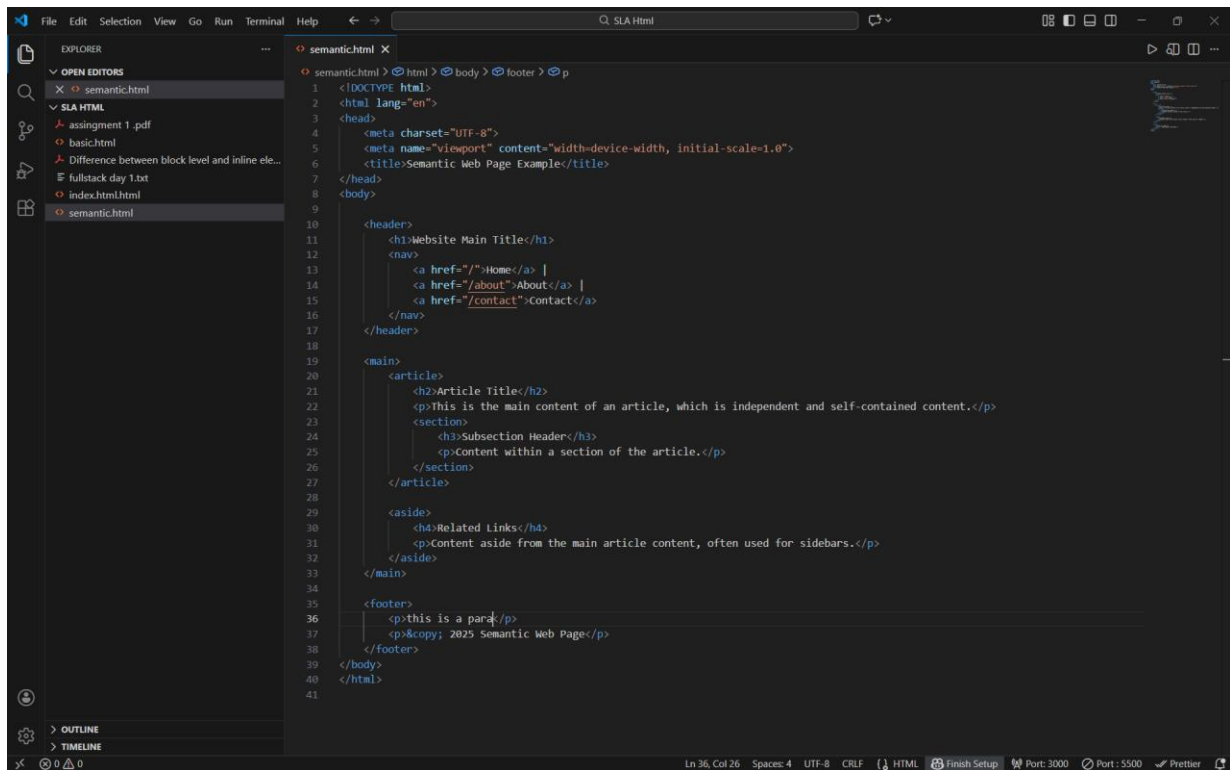

2. Learn how <aside> is used for side content (ads, sidebars) and <main> for primary content. Build a sample page.

<aside> element is used to create content that is related to the content around it and could be considered separate from that content itself whereas on the other hand the <main> element is used to create the central part of the html web page which includes the <nav> <section> <article>

REAL TIME EXAMPLE

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Semantic Web Page Example</title>
7 </head>
8 <body>
9
10   <header>
11     <h1>Website Main Title</h1>
12     <nav>
13       <a href="/">Home</a> |
14       <a href="/about">About</a> |
15       <a href="/contact">Contact</a>
16     </nav>
17   </header>
18
19   <main>
20     <article>
21       <h2>Article Title</h2>
22       <p>This is the main content of an article, which is independent and self-contained content.</p>
23       <section>
24         <h3>Subsection Header</h3>
25         <p>Content within a section of the article.</p>
26       </section>
27     </article>
28
29     <aside>
30       <h4>Related Links</h4>
31       <p>Content aside from the main article content, often used for sidebars.</p>
32     </aside>
33   </main>
34
35   <footer>
36     <p>this is a para</p>
37     <p>&copy; 2025 Semantic Web Page</p>
38   </footer>
39 </body>
40 </html>
41
```

3. Combine `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<aside>`, `<footer>` to create a complete webpage layout.

<header> : used to give a title or head to the document for a better understanding of the concept

<nav> : a navigation bar used to go through other important accessible topics in the html page : example home, services, about, help etc

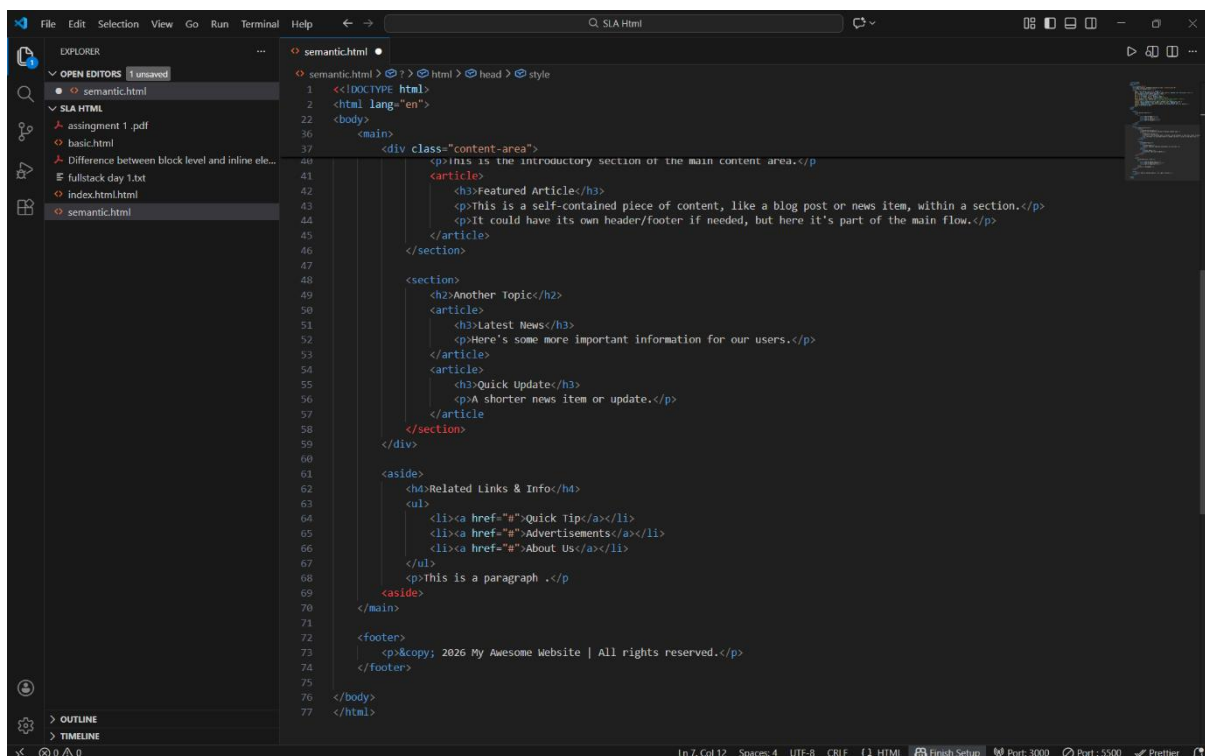

<section> : a section tag is used to define the article, It is used to group content that is thematically related and would logically appear as an entry in the document's outline.

<article> : the article tag is a semantic individual tag that can be distributed or reused

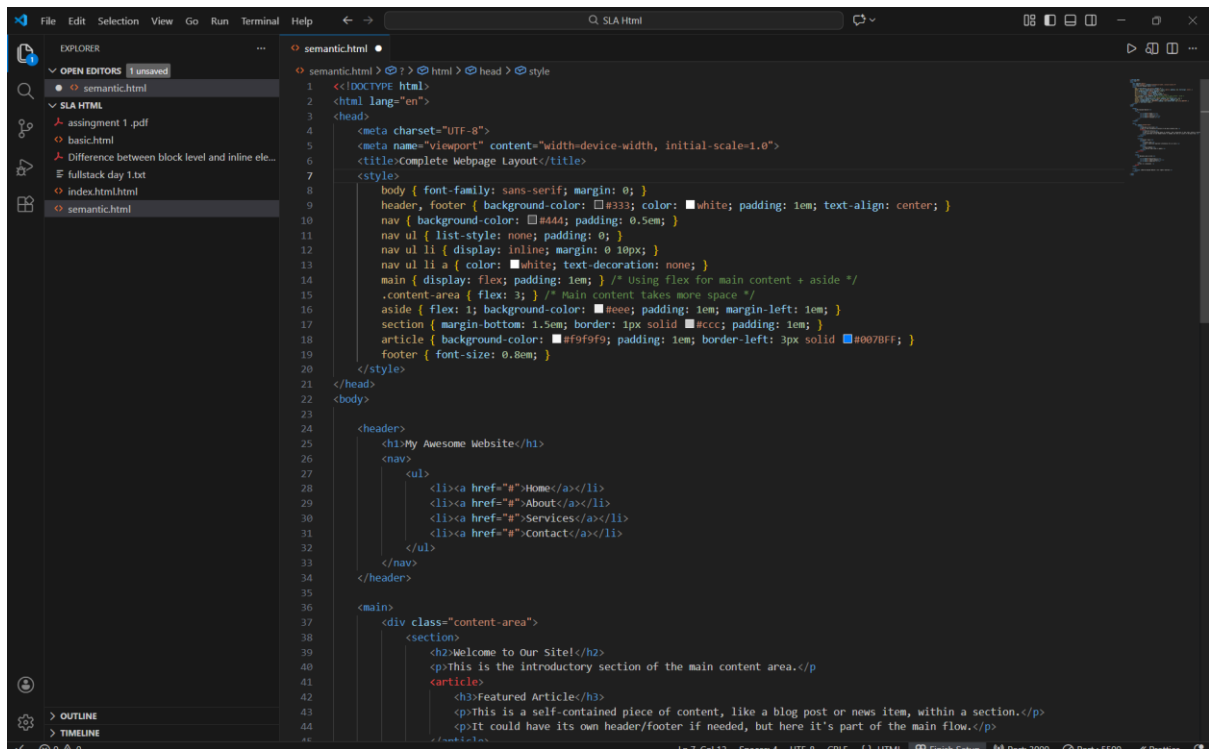

<aside> : the aside tag is used to make content that are less important than that of the main content

<footer> : the footer tag used to create copyrights related content which gives the website a completion

2 <html lang="en">
22 <body>
36 <main>
40 <div class="content-area">
41 <article>
42 <h3>Featured Article</h3>
43 <p>This is a self-contained piece of content, like a blog post or news item, within a section.</p>
44 <p>It could have its own header/footer if needed, but here it's part of the main flow.</p>
45 </article>
46 </section>
47
48 <section>
49 <h2>Another Topic</h2>
50 <article>
51 <h3>Latest News</h3>
52 <p>Here's some more important information for our users.</p>
53 </article>
54 <article>
55 <h3>Quick Update</h3>
56 <p>A shorter news item or update.</p>
57 </article>
58 </section>
59 </div>
60
61 <aside>
62 <h4>Related Links & Info</h4>
63 <ul>
64 <li><a href="#">Quick Tips</a></li>
65 <li><a href="#">Advertisements</a></li>
66 <li><a href="#">About Us</a></li>
67 </ul>
68 <p>This is a paragraph .</p>
69 </aside>
70 </main>
71
72 <footer>
73 <p>&copy; 2026 My Awesome Website | All rights reserved.</p>
74 </footer>
75
76 </body>
77 </html>
```

The image shows a Visual Studio Code editor window with a file named `semantic.html` open. The Explorer sidebar on the left shows the file structure, including `semantic.html` and several other files like `assignment 1 .pdf`, `basic.html`, `Difference between block level and inline ele...`, `fullstack day 1.txt`, `index.html.html`, and `semantic.html`. The main editor area displays the code for `semantic.html`, which is a combination of HTML and CSS. The code is as follows:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Complete Webpage Layout</title>
7 </head>
8 <body>
9   body { font-family: sans-serif; margin: 0; }
10  header, footer { background-color: #333; color: white; padding: 1em; text-align: center; }
11  nav { background-color: #444; padding: 0.5em; }
12  nav ul { list-style: none; padding: 0; }
13  nav ul li { display: inline; margin: 0 10px; }
14  nav ul li a { color: white; text-decoration: none; }
15  main { display: flex; padding: 1em; } /* Using flex for main content + aside */
16  .content-area { flex: 3; } /* Main content takes more space */
17  aside { flex: 1; background-color: #eee; padding: 1em; margin-left: 1em; }
18  section { margin-bottom: 1.5em; border: 1px solid #ccc; padding: 1em; }
19  article { background-color: #f9f9f9; padding: 1em; border-left: 3px solid #007bff; }
20  footer { font-size: 0.8em; }
21 </body>
22 </html>
23
24 <header>
25   <h1>My Awesome Website</h1>
26   <nav>
27     <ul>
28       <li><a href="#">Home</a></li>
29       <li><a href="#">About</a></li>
30       <li><a href="#">Services</a></li>
31       <li><a href="#">Contact</a></li>
32     </ul>
33   </nav>
34 </header>
35
36 <main>
37   <div class="content-area">
38     <section>
39       <h2>Welcome to Our Site</h2>
40       <p>This is the introductory section of the main content area.</p>
41       <article>
42         <h3>Featured Article</h3>
43         <p>This is a self-contained piece of content, like a blog post or news item, within a section.</p>
44         <p>It could have its own header/footer if needed, but here it's part of the main flow.</p>
45       </article>
