

1. difference b/w `<b>` and `<strong>` (semantic importance).

`<b>`

Makes text appear dark and bigger in font size

No semantic meaning (does not indicate importance)

Used when attention for style or to highlight key words

REAL WORLD EXAMPLE FOR BOLD :

PLEASE BRING YOUR `<B>`Passport`</B>` THE WORD PASS WORD HERE IS IN BOLD

REAL TIME EXAMPLE :

PRODUCT NAMES : APPLE ,SAMSUNG

STYLING TEXT WITHOUT CHANGING MEANING

`<strong>`

Indicates the text is important or urgent

The screen readers for blind people announces it with emphasis

Affects both accessibility and meaning

REAL TIME EXAMPLE

Adds **meaning**: indicates that the text is important, urgent, or has strong emphasis.

Screen readers often announce it with extra stress (e.g., “important”).

Search engines may treat it as more significant than normal text.

REAL WORLD EXAMPLE

PLEASE BRING YOUR `<STRONG>`Passport`</STRONG>` THE WORD PASS WORD
HERE IS IN STONG

2. Understand `<i>` (italic styling) vs `<em>` (emphasis). Use them in a paragraph.

(Italic Styling)

Purely **visual**: slants the text for stylistic effect.

Often used for titles of books, foreign words, or technical terms.

No semantic meaning — it's just presentation.

(Emphasis)

Adds **semantic importance**: indicates stress or emphasis in meaning.

Screen readers may announce it with vocal stress (like “emphasis”).

Useful when you want the reader to understand that the word or phrase is **emotionally or logically stressed**, not just styled.

REAL TIME EXAMPLE

- `</i>`= “Make this text look italic.”
- `<EM>`= “This text should be read with emphasis.”

IN HTML : When I visited Italy, I kept a journal called `<i>Viaggio</i>`, which means "journey" in Italian.

In one entry, I wrote: "You must `<em>always</em>` try the local food before leaving a city."

The word `<i>Viaggio</i>` is italicized because it's a foreign title, while `<em>always</em>` is emphasized to show its importance in the advice.

`<i>` is used for the foreign word *Viaggio* (styling only).

`<em>` is used for *always* to stress the importance of the action.

3. Practice underlining text with `<u>`, highlighting with `<mark>`, and making side notes with `<small>`.

(Underline Styling)<u>

Purely visual: underlines text.

Often used for emphasis, but nowadays underlines are avoided in web design because they can be confused with links.

(Highlighting)<mark>

Semantic: indicates text that is highlighted or marked as relevant.

Screen readers may announce it as “highlighted.”

Useful for drawing attention to key phrases.

(Side Notes / Fine Print)<small>

Semantic: represents smaller, less important text.

Often used for disclaimers, side notes, or copyright notices.

Screen readers treat it as normal text but visually it appears smaller.

this is mark

this is small

this is underline During the seminar, the professor said: Always back up your data before making changes. She added that cybersecurity awareness is crucial in today's world. At the end of the handout, there was a note: *This advice is general and not a substitute for professional IT consultation.
